Fish Care & Processing

Our fish processing is provided through a certified local processor. The fish processing plant uses a 6-step process, to ensure you bring home the freshest catch possible. All your fish processing and transportation fish boxes are included in your package.

STEP 2

Fish are separated by individual, or group orders, and put on ice.

STEP 4

Your catch goes straight into the Blast Freezer, to ensure long-lasting freshness.

STEP 6

Your specially packed fish will be delivered to the Sandspit airport, at the time of your departure.

Processor's staff will meet you at the dock, upon your return from fishing.

STEP 3

Once filleted, your catch is vacuum-packed, and labeled.

STEP 5

Your fish is placed in a specially designed fish box, to retain temperature.
